

# Discover How Real-Time Computer Parenting Can **Stop** **Internet Predators** from Harming Your Family!

**Did You Know:** Only 1/3 of the households with Internet access are proactively protecting their children with filtering or blocking software.

Dear Parent:

"You Wouldn't Allow Your Children to Play Next to a Busy Road Without Supervision - Yet Children Play All the Time **Without Being Watched** on the Information Super Highway!"

It's no secret... Each time your child connects to the internet, there are criminals actively targeting your family members. It's estimated that one in seven children online (ages 10-17) has received a sexual solicitation or approach on the internet.

It's an unfortunate but true fact. The Internet is quickly becoming a powerful tool for criminals to attack and exploit children. According to law enforcement officials most internet sexual predators will prey on anyone- so there is no particular child who is more of a target than another. One technique sexual predators use is to pretend to be an interested friend in chat rooms until they develop a relationship with your child. Then the predator might request personal information such as your child's phone number and address. The results are often too scary to imagine.

And, just as your child may be subject to being a victim of child pornography, time spent online also means they also have easy access to pornography - even if they aren't necessarily looking for it. In fact, according to a recent Department of Justice survey, 25% of kids who use the internet had inadvertently stumbled upon sexually explicit material that they were not seeking out.<sup>1</sup> Or, perhaps your teenage son or daughter closes their door to the computer room, or has access to the computer when no one is home. Can you really be sure they aren't viewing pornography or other inappropriate content?

**It's Time You Take Control of Your Children's Online Safety!**

Just imagine if you could look over your child's shoulder any time you wanted. Simply knowing that your invisible presence could be there would certainly make your adolescent think twice before venturing into the dark corners of the Internet. By monitoring the internet activity of your children you'd be better able to make decisions about what websites and programs they regularly use.

	<b>Protect Your Children and Family With Computer Parenting!</b>
--	--

**Computer Parenting** is a revolutionary new web-monitoring solution that allows you to monitor and control your children's computer activity all with a few simple mouse clicks. You'll be able to easily understand your children's computer usage and make decisions about inappropriate content. Best of all, **Computer Parenting** will make sure your rules are always enforced - even when you aren't home.

### **What Does Computer Parenting Provide Exactly?**

*The **Computer Parenting** software enables total control of your children's or family computer by blocking video games and any unsafe websites you choose.*

*Allows for real time monitoring by viewing live screenshots. You'll be able to view what your children are typing; including emails and instant messages.*

*Easily define "rules" based on certain inappropriate content which are enforced whenever your child uses the computer.*

*Allows you to send messages, close windows or shut down the computer remotely.*

*Allows for easy and quick viewing of activity logs so you're able to review websites your children have recently visited.*

*Gives Parents the control to decide what their children can & cannot view online.*

*Gives you the power of blocking and unblocking entire programs on your child's computer.*

Imagine being at work and using **Computer Parenting** to quickly find out that your kids are playing video games instead of doing homework after school. With Computer Parenting, you'll be able to send your kids a warning message, and if that doesn't work, you can remotely close the program and block it from ever being run. When your children's homework is done, you can unblock the program using your browser. It's really that simple! With **Computer Parenting**, as long as you are able to access an internet browser, you'll be able to monitor your kids' computer activity and take control at anytime.

Best of all, **Computer Parenting isn't a limited desktop application like other computer monitoring solutions.** Our membership also provides important security measures you can take in order to better secure your children's computer. **Exclusive "Teenager Resistant™" Technology**

Teenagers are extremely resourceful. They are quite skilled at figuring out how to delete log files, screenshots, and computer histories. Clever Teenagers even search online for tips from other kids who've discovered how to bypass computer monitoring programs and clear browser histories.

**Computer Parenting** uses state-of-the-art Teenager Resistant™ technology making it difficult for clever young users to bypass the software. User logs are stored securely online where they cannot be altered or deleted. Best of all, **Computer Parenting** has built-in defenses in order to keep it from being shut down.

Plus, that's not all...

### "Block Entire Computer Programs, Video Games, Websites, and Instant Messenger Programs All With a Few Simple Mouse Clicks!"

*Never again will your son or daughter be able to hide from you the websites they are visiting when you aren't home.*

***Computer Parenting** blocks and unblocks entire computer programs, video games, websites, and Instant Messengers all with a few simple mouse clicks.*

*Allows you to decide when it is time for your children to get off the computer or what applications and programs they can access.*

*View detailed activity logs of your child's online activity.*

*Send messages or alerts remotely to your children.*

*Close windows or shut down programs remotely.*

*You can even see what your children are typing and shut down the entire computer from any remote internet connection.*

### Take Control of Your Children's Online Safety!

Unfortunately, many parents fail to protect or monitor their children's online activities. Unaware or unconcerned about the real dangers that lurk on the Internet, parents often leave their kids' safety up to chance.

With **Computer Parenting** you can finally take control of your children's online and computer experience while better protecting your family from the dangers of the internet.

## Why Join Computer Parenting?

*Many teenagers can shut down similar products in about 10 seconds - but not **Computer Parenting!***

*Unlike other web and computer monitoring products, **Computer Parenting** is specifically designed to be "teenager resistant".*

***Computer Parenting** puts you in control remotely. Unlike other solutions you can gain access to your home PC at anytime - day or night. All you need is an internet connection (even a slow dialup connection works fine!)*

*Much more robust than other computer monitoring software and much harder for your children to disable.*

*Our customer base is primarily parents of teenagers making our software the best solution for households with teenagers and children of multiple ages.*

*Membership is less than **.13 cents/ per day!***

***Absolutely No Hidden Fees or Charges!** Our low monthly fee covers software upgrades, support and web site bandwidth. **EVERYTHING** is included!*

### "A Unique Blend of Flexibility and Functionality..."

A **Computer Parenting** membership offers a unique blend of flexibility and functionality. The web and computer monitoring software offers the following configurable features (available from a browser any where in the world with internet access):

#### **Complete Activity Logging:**

*1- Logs application usage (including when and what window the user has opened and has active). This is not limited to browser activity. Our software logs any open window or program as well as who is logged in.*

*2- Logs all keystrokes (even for multiple users)*

*3- Logs all browser and URL history*

*4- Provides periodic screen shots of your children's activity (**Computer Parenting** can send automatically for every 15 minutes of activity or any time on demand).*

### **Remote Control Access and Control:**

- 1- Send messages to your children remotely.
- 2- Close selected windows permanently from any remote computer.
- 3- Log your children off at anytime (No more fighting with your teenager to get off the computer!)
- 4- Forced Shut Down of any application or program.

### **Remote Notification of Rule Violation:**

- 1- Sends an email alert to you whenever your child violates one of the usage rules you've established.
- 2- **Computer Parenting** can even send a Text Message to your cell phone - alerting you of your child's computer activities.

### **Complete Web Site Filtering:**

- 1- Blocks websites on your own restricted list
- 2- **Computer Parenting** can be easily configured to block websites that are not on the permitted list
- 3- Blocks non-browser ports to disable applications like instant messaging, Internet gaming applications, file sharing programs, etc.

### **EXCLUSIVE Parental Resources:**

- 1- Monthly newsletter with tips on keeping your kids safe, and how to protect your home computer/network from intruders.
- 2- E-Book on computer parenting showing you how you can make the most of your home computer while keeping your kids safe.

**Monitor & Control Your Family's Computer at ANYTIME from ANYWHERE in the World for less than .13 Cents/Per Day!**

**Other computer and web monitoring software can cost you as much as \$170 annually with many hidden costs including extra bandwidth and usage charges - **Computer Parenting** is the only computer and web monitoring solution that offers so much for literally pennies/ per day!**

Wishing you and your family all the best,

**David LastName**

**PS.** Many other Computer & Web Monitoring products can be hacker-prone and your children can easily disable them by simply searching the help tips from search engines. **Computer Parenting** uses state-of-the-art Teenager Resistant™ technology making it difficult for clever young users to bypass the software.
